  40-Track programmable
  Repeat one/all/program
  Shuffle play
- CD loader type: Motorized front

Tuner / Reception
- Auto digital tuning
- RDS:
  Station name, Program type, Radio text,
  RDS clock set, News and Traffic
  Announcement (/22, /25 only)
- Station presets: 40
- Tuner bands:
  FM
  MW
- Tuner enhancement: Autostore

Connectivity
- Audio input analog: Aux in (cinch)
- Headphone: 3.5mm stereo jack
- Rear connections:
  FM coxial antenna
  MW loop antenna

Convenience
- Alarm enhancement technology:
  CD or radio alarm timer
  Sleep timer
- Clock display
- Display type: LCD
- Backlight: Blue

Accessories
- FM and MW antennas
- 23-key remote control with battery
- 2 x plug and screw assembly for wall mounting

Dimensions
- Center unit dimensions (WxHxD):
  250 x 245 x 96 mm
- Main speakers dimensions (WxHxD):
  166 x 245 x 90 mm
- Packaging dimensions (WxHxD):
  305 x 314 x 375 mm
- Product weight: 7 kg

Product highlights

Digital Sound Control
Digital Sound Control lets you select from pre-set modes that control the frequency bands of sound to optimize certain musical styles. You can chose between different sound settings - Optimal, Jazz, Rock, Techno, Pop or Classic. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Digital Sound Control lets you get the most out of your music by adjusting the sound balance to match the music type you are playing.

Dynamic Bass Boost
Dynamic Bass Boost maximizes your music enjoyment by emphasizing the bass content of the music throughout the range of volume settings - from low to high – at the touch of a button! Bottom-end bass frequencies usually get lost when the volume is set at a low level. To counteract this, Dynamic Bass Boost can be switched on to boost bass levels, so you can enjoy consistent sound even when you turn down the volume.

Bass Reflex Speaker System
Bass Reflex Speaker System delivers a deep bass experience from a compact loudspeaker box system. It differs from a conventional loudspeaker box system in the addition of a bass pipe that is acoustically aligned to the woofer to optimize the low frequency roll-off of the system. The result is deeper controlled bass and lower distortion. The system works by resonating the air mass in the bass pipe to vibrate like a conventional woofer. Combined with the response of the woofer, the system extends the overall low frequency sounds to create a whole new dimension of deep bass.
